

Paper Scanning

Imaging projects are often scuttled even before they begin because organizations are overwhelmed by the sheer enormity of the amount of historical information they carry in paper. We can help with that. Our Service Bureau is equipped and staffed to convert your historical documents to digital format while you concentrate on processing the information that comes to you from the day you install your system forward. If you simply don't want to use your time and resources to scan, we can pick up and scan your records monthly or annually.
